

Kolram creates secure access for special needs schools with help from Millennium Group.

Original Challenge:

Create a secure system for 500 door special needs school

The Evolution:

The need to expand security solutions to multiple new locations

The Solution:

- Flexible hardware and software platform
- Video integration capability for seamless installation and deployment

"We have been working with Millennium for 20 years and we have a great relationship. I like the whole team and how easy it is for us to get the reliable parts we need for our projects. The support from your team has been rock solid and I look forward to a continued successful business relationship with Millennium."

**Joe Montini, President,
Kolram Access Services.**

Kolram and Millennium have been working together for over 20 years with Millennium providing resources for the majority of the Connecticut based security company's access control installation projects. "The one thing I like about Millennium that no other access control company can do is that you can t-tap and star tap anywhere in the chain for flexible installation" says Ian Robertson, Project Manager and estimator at Kolram. "It makes Millennium unique and allows us to install with flexibility, even in the oddest scenarios".

Kolram recently needed to install a 500 door system for a ACES, a special needs cooperative with multiple school locations in Connecticut and they turned to Millennium for a cost effective and flexible hardware and software installation solution. The reliability of the Millennium system and the multiple integrations with video surveillance which is the main staple at Kolram allowed for a smooth project, efficiently installed on budget and on time. The success of the project led to the award of more ACES locations to Kolram Access Services.

The Result:

Kolram is going ahead to install additional doors for the new ACES school locations and is in the process of upgrading all their systems to the new Millennium Ultra software platform.
